VISHVITHA KOMMINENI

komminenivishvitha@gmail.com +91-9182424223 LinkedIn LeetCode Hyderabad, India

SUMMARY

Third-year B.Tech student specializing in Artificial Intelligence and Machine Learning with a strong foundation in Java, Data Structures and Algorithms, Object-Oriented Programming, Python, SQL, frontend development, and Machine Learning. Actively strengthening problem-solving skills through regular LeetCode practice and hands-on programming projects. Seeking software development, AI/ML, and technical internship opportunities.

EDUCATION

CMR College of Engineering and Technology — Aug 2024 – May 2028

B.Tech in Artificial Intelligence and Machine Learning

Coursework: Programming in Java, Data Structures & Algorithms, Object-Oriented Programming, Machine Learning, Python Programming, Database Management Systems, Discrete Mathematics, Engineering Mathematics

TECHNICAL SKILLS

Programming: Java, Python, SQL
Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Problem Solving
Frontend Development: HTML, CSS, JavaScript
AI & Machine Learning: Regression, Classification, Natural Language Processing (NLP), Data Preprocessing, Feature Engineering, Model Evaluation
Libraries & Tools: NumPy, Pandas, Scikit-learn, Matplotlib, Jupyter Notebook, Git, GitHub, Streamlit
Database: MySQL

PROJECTS

Farm2Home

- Developed a responsive frontend web application connecting farmers directly with customers for agricultural products.
- Designed product listings with farmer details, pricing, organic status, and farm location.
- Implemented shopping cart and order functionality using HTML, CSS, and JavaScript.

Krish Handicraft Store

- Developed a responsive e-commerce frontend website for browsing and showcasing handcrafted products.
- Designed product cards, navigation, categories, and interactive user interface components using HTML, CSS, and JavaScript.
- Created a clean and user-friendly shopping experience across different screen sizes.

Student Performance Prediction System

- Built a Machine Learning model to predict student performance using academic, demographic, and social factors.
- Performed data preprocessing, categorical feature encoding, and feature engineering using Pandas and Scikit-learn.
- Trained Linear Regression and Polynomial Regression models and evaluated their performance.
- Developed an interactive prediction interface using Streamlit.

Spam Email Detection using NLP

- Developed a Machine Learning model to classify emails as spam or legitimate using Natural Language Processing.
- Applied text preprocessing and TF-IDF vectorization to convert email content into numerical features.
- Trained classification models and evaluated performance using accuracy, precision, recall, and F1-score.
